

# BULL RIVER BRIDGE CLUB

*The original bridge building crew, 1910-20, as pictured in late local historian Verd Casselman's book "Ties to Water." It was recently replaced by a new acrow panel bridge.*

*The 75 members of the Canadian Armed Forces West Field Engineers were assembled from Trail, Calgary, Edmonton, and Vancouver for this special project in conjunction with the Ministry of Transportation and Highways manager Larry Patterson, and Doug Wilson, the District Bridge Maintenance manager.*

*Wednesday, April 2, 1991. The army engineers dedicated the bridge to a fellow WWII engineer Verd Casselman with the installation of a plaque. Verd's sister Betty Bjorn was moved to tears by this simple act of remembrance.*
